Summary

Working at **RIGHT SOLUTIONS** since February 2016 on PHP laravel as **BACKEND LEAD**. I have also worked for five (5) years as freelancer in various programming languages across different platforms.

About Me

I am passionate developer keen to learn new technologies I have strong OOP ,database and problem solving skills, I started my career as free lance C# developer after first year at my university then I started working as android developer, I worked on C sharp and android for three years during my university, then I learned php laravel and start working at right solutions as junior php developer but with hard work and learning capabilities I soon got the position of **BACKEND LEAD** ,I am currently learning react native. Looking forward to work in renowned company where I can polish my skills, I will prove myself to be a valuable asset for your company InshAllah .
